Serial No. 09/687,033 Docket No. STL920000062US1 Firm No. 0054.0033

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims

1	1-7. (cancelled)
1	8. (previously presented) A method of installing an application program for execution
2	on a data processing system, said method comprising:
3	defining a user configuration of the application program installation corresponding to a
4	particular user of the application program installed on a first data processing system;
5	encrypting and storing the user application program installation configuration in a
6	manifest file;
7	determining that the stored user application program installation configuration
8	corresponds to the particular user;
9	authenticating the particular user in response to the particular user requesting the
10	application program for installation on a second data processing system;
11	decrypting the manifest file in response to the user authentication; and
12	building the application program on the second data processing system in a configuration
13	customized to conform to the user application program installation configuration decrypted from
14	the manifest file.
1	9. (previously presented) The method of claim 8 wherein the second data processing
2	system is a local data processing system and further comprising:
3	storing the user application program installation configuration on a remote server
4	executing on a remote data processing system;
5	initiating a session between the local data processing system and the remote data
6	processing system in response to the particular user requesting the local application program;

Serial No. 09/687,033 Docket No. STL920000062US1 Firm No. 0054.0033

7	responsive to the user authentication, downloading data from the remote data processing
8	system to the local data processing system according to the stored user application program
9	installation configuration; and
10	downloading the manifest file from the remote data processing system to the local data
11	processing system.
1	10. (Previously presented) The method of claim 9 further comprising:
2	authenticating the particular user in a second authentication responsive to the particular
3	user requesting a build of the application program;
4	decrypting the manifest file responsive to the second authentication; and
5	building the application program pursuant to the user application program installation
6	configuration decrypted from the manifest file responsive to the second authentication.
1	11. (Previously Presented) The method of claim 8 further comprising:
2	recording a description of items that are being used by the particular user.
1	12. (Original) The method of claim 11 wherein the recorded description is used for
2	administering licensing of the items.
1	13. (Original) The method of claim 9 wherein the remote server is a web server.
1	14. (Previously presented) The method of claim 8 wherein the user application
2	program installation configuration comprises data describing the particular user, the particular
3	user's application program user configuration, and resources for which the particular user is
4	authorized.
1	15-21. (cancelled)
